

**The Professional Farm
Management Software**

**Cloud and Mobile Farm Management Software for
Farmers, Producer Organizations and
Farm Enterprises**

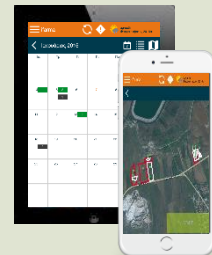

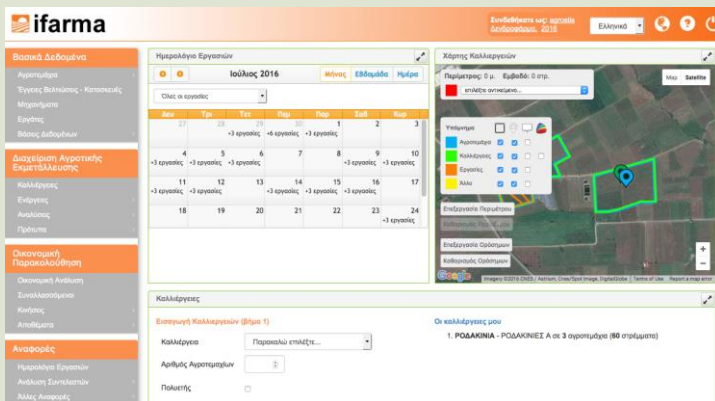

How ifarma works ?

The ifarma app works both as a cloud/web and as a mobile app. It is suitable both for individual farmers and for producer organizations, cooperatives, and agriculture production companies.

- Keep track of all your Fields, Machinery, Workers, Farming Tasks, Crops, Financial transactions.
- Agronomist / group administrator can plan - order farming tasks and activities to individual farmers.
- Group administrator has access to all Farming data logged by individual farmers.

What are the benefits ?

- Fully featured Farm Management Information System (Field Management, Crops, Farming tasks, Stock management, Financials).
- Integrated data base for single farms and producer organizations enables on-line communication and information exchange between farmers and group administrator.
- Central administration for farmer groups, cooperatives, food production companies. Complete view of all activities in the fields.
- Easy to use, mobile app works off-line and synchronizes automatically when online.
- Complete set of customizable reports.
- Elaborate financial management.
- Use mobile device GPS for tracking farming activities, take photos, keep notes and reminders.
